Company Overview

BellBit Software Technologies is a software development company that builds both software products and custom digital solutions for clients. We help organizations and individuals solve real business problems through reliable, scalable, and well-designed software systems.

BellBit

Our Mission, Vision & Value

Mission

To create digital solutions and technologies that help people run their businesses efficiently.

Vision

To ensure everyone has access to the tools and solutions needed to manage their businesses effectively and confidently.

Value

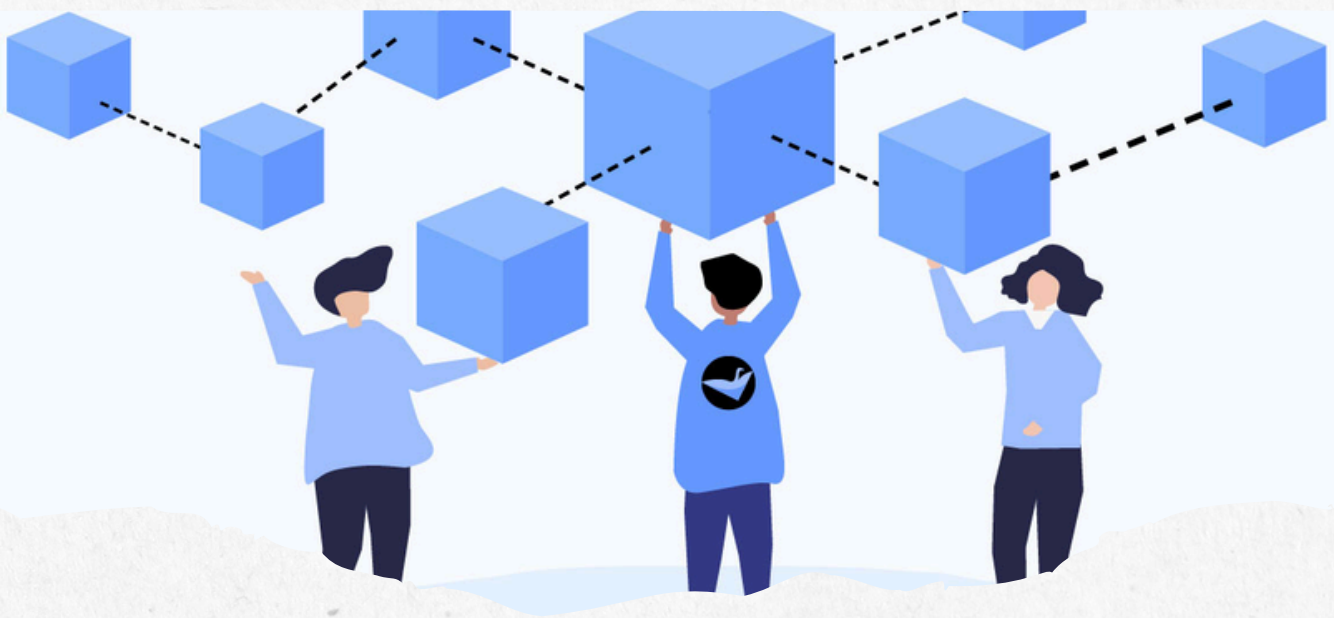

- Continuous learning
- Integrity
- Professionalism

History & Milestones

BellBit Software Technologies was established on 01/ 10 2024 and officially licensed on 08/ 10/ 2025. The company began with a small group of developers focused on building solutions that benefit the general public.

As client needs grew, BellBit expanded its focus to solving real-world business challenges by transforming them into practical digital solutions. The team grew steadily, from three members to five, then seven, and now eight professionals.

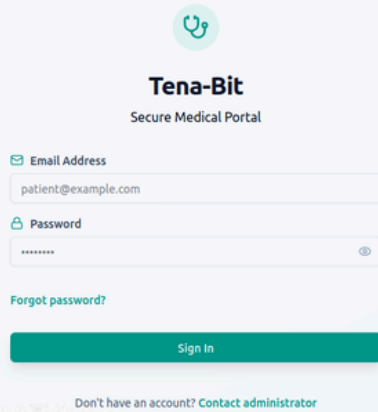

After becoming a legally registered entity, BellBit started delivering larger projects for both domestic and international clients. Over time, the company has successfully completed numerous projects, ranging from simple corporate websites to complex, constraint-based systems for well-known organizations nationwide. BellBit continues to grow with a strong focus on quality and impact.

Our Service

Our core services focus on software development and related technical solutions

- Custom software and system design
- Custom software and system development
- System analysis and requirement gathering
- System architecture design & Solution engineering
- Software deployment and infrastructure management

- UI/UX design

The image shows a login interface for 'Tena-Bit Secure Medical Portal'. At the top is a logo with a stethoscope icon. Below it, the text 'Tena-Bit' and 'Secure Medical Portal' are displayed. There are two input fields: 'Email Address' with the placeholder 'patient@example.com' and 'Password' with a masked password '*****'. A link 'Forgot password?' is located below the password field. A green 'Sign In' button is at the bottom. At the very bottom, there is a link: 'Don't have an account? Contact administrator'.

 **Secure System**

Your Health Data, Protected

Modern secure platform designed for Ethiopian hospitals and clinics.

- Complete data protection
- Authorized access only
- 24/7 technical support
- Integrated record keeping

Our Products

BellBit develops software products mainly focused on the health and business management sectors, including:

BinWise (Inventory Management System)

- A cloud-based inventory and stock management system that allows businesses to easily register, manage inventory, track stock movement, and generate reports.
- You can visit BinWise on binwise.bell-bit.com

Portfolio

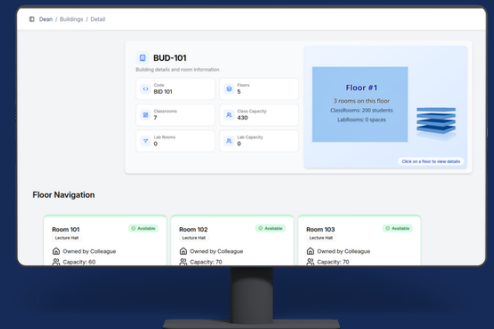

Hoomez

An e-commerce platform developed for a UAE-based client, focused on construction materials, furniture, and property management.

The system includes full e-commerce functionality, AI-powered search using RAG and LLM integration, tender request creation, and video reel uploads for product promotion.

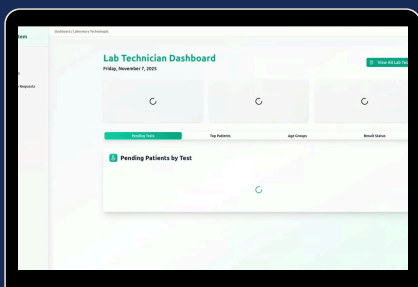

A university-level scheduling system developed for Addis Ababa University.

It manages academic resources and includes a constraint satisfaction engine that automatically generates semester schedules based on curriculum, instructors, classrooms, and availability.

CSMS

Portfolio

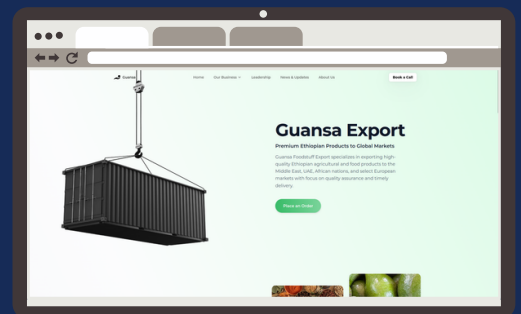

A healthcare system designed to track patient movement and medical records across registration, OPD, laboratory testing, results management, and medication prescription workflows.

Tena-BIT

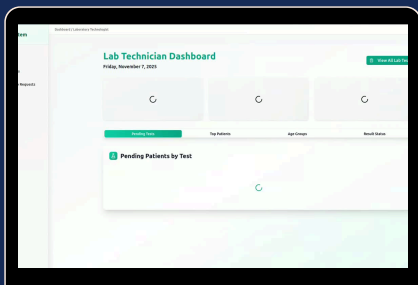

The Guansa PLC website is a corporate platform that showcases all subsidiary companies, including Guansa Mead and Guansa Export.

It was designed with a modern, clean style and optimized for fast loading and easy use. The website includes a custom CMS, allowing the company to manage and update content independently.

Let's Work Together

At BellBit Software Technologies, we believe the best solutions come from close collaboration. Whether you are starting a new idea, improving an existing system, or looking for a reliable technology partner, we are ready to help.

We take time to understand your needs, design the right solution, and build software that works for your business. From planning and development to deployment and support, we work with you at every step.

If you have a challenge you want to solve or an idea you want to bring to life, let's talk.

Client references and case studies are available upon request.
